

- 1) We will tag the “ShareOnFacebook” test like this:

```
@attr(group="socialNetworking")
```

The other tests will have the following tag:

```
@attr(group="others")
```

- 2) The nose command will be:

```
nosetests --verbosity=2 --no-byte-compile -a group=socialNetworking
```

- 3) The nose command will be:

```
nosetests --verbosity=2 --no-byte-compile --failed -a group=others
```
