For questions 1) and 2), all we have to do is add a test in our "tests" folder. The test is named "SearchProductTest" in the solution code.

For question 3), we have to do the following:

a) Specify the Twitter credentials in the test parameters file "Constants.py"
b) Modify the "TestCase.py" code so that user is logged in Twitter
c) Add a test in our "tests" folder. The test is named "ShareOnTwitterTest" in the solution code.
